Our Services for the Automotive Industry

Opus Safety Ltd is a leading provider of comprehensive health and safety, occupational health, HR, and management software solutions.

We understand the unique challenges faced by the automotive industry, which demands stringent safety standards, efficient processes, and effective risk management. In this document, we will explore how our services can benefit the automotive sector by enhancing safety, improving occupational health, optimising HR operations, and streamlining management processes.

Safety and Compliance:

Ensure automotive industry compliance by conducting audits, providing tailored training programs, and enabling efficient risk assessment and management.

Effective HR Solutions:

Our services ensure compliance with regulations through tailored contracts and handbooks, foster positive employee relations with training courses, workshops and much more.

Occupational Health:

Safeguard automotive workers' well-being through comprehensive health assessments, tailored surveillance programs, and full medicals.

Efficient Processes:

By utilising our software, Opus Compliance Cloud, you will be able to keep your safety requirements on schedule with bespoke online checklists, e-learning and QR codes for easy in-house audits.

Opus Safety's suite of services are uniquely tailored to meet the specific needs of the automotive industry. By implementing our solutions, automotive businesses can significantly enhance safety, improve occupational health, optimise HR operations, and streamline management processes. Our bespoke services and software solutions empower automotive companies to meet and exceed safety compliance standards and make informed decisions based on real-time data.

With Opus Safety as your trusted partner, you can foster a culture of safety, efficiency, and employee well-being within your organisation.

Contact us today on 0330 043 4015 to explore how our services can revolutionise your safety, occupational health and HR, and propel your automotive business towards a brighter, safer, and more efficient future.
